

CONSUMER PRICE INDEX (CPI) FEBRUARY, 2009: PRESS RELEASE

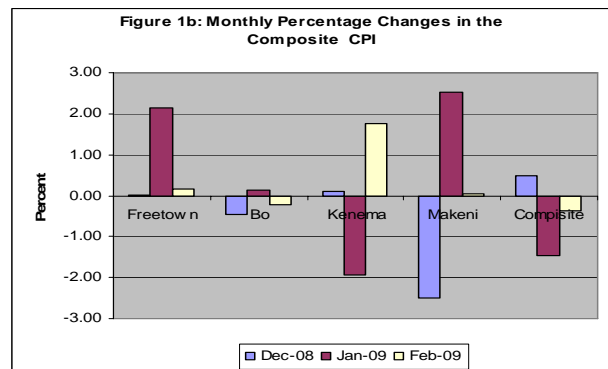

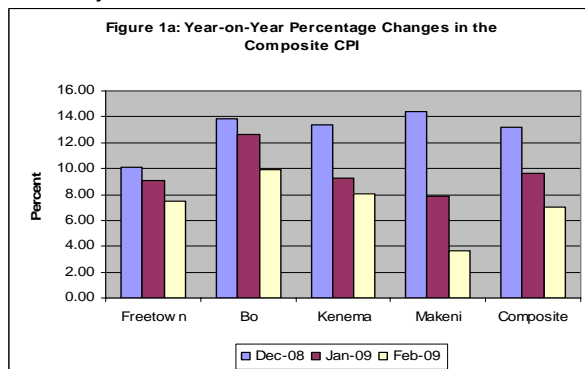

Released on Monday, February 16, 2009: at 1:00 pm

FEBRUARY 2009 ANNUAL INFLATION RATE DECREASES SIGNIFICANTLY

The Composite year-on-year Inflation rate (2003=100) decreased by 2.6 percentage points from 9.64 per cent in January 2009 to 7.04 percent in February 2009. When the CPI for this month is compared with the figure for last month, the monthly rate of inflation for February 2009 also declined by 0.37 per cent.

There were decreases in the year-on-year rate of inflation in all centers during the month of February 2009 resulting in single digits rates of inflation been recorded in all CPI townships in the month of February 2009. Inflation declined in Freetown from 9.1 per cent in January 2009 to 7.5 per cent in February 2009, in Bo from 12.62 per cent in January 2009 to 9.96 percent in February 2009, in Kenema from 9.3 per cent in January 2009 to 8.0 per cent in February 2009 and in Makeni from 7.9 per cent in January 2009 to 3.6 per cent in February 2009.

In the old CPI series (1992=100) similar trends were recorded. The annual rates of inflation decreased in Freetown from 11.18 per cent in January 2009 to 9.75 percent in February 2009, in Bo from 10.03 per cent in January 2009 to 7.09 per cent in November 2008, in Kenema from 11.28 percent in January 2009 to 9.74 percent in February 2009 and in Makeni from 9.43 percent in January 2009 to 5.23 per cent in February 2009.

FACTORS INFLUENCING CHANGES IN THE MONTHLY RATE OF INFLATION

The combined monthly CPI for November 2008 decreased from 186.15 per cent in January 2009 to 185.44 per cent in February 2009. The decline in the CPI this month was driven by decreases in the cost of food especially fish, oils and fats, sugar etc) reinforced by decreases in the price of non-food products such as tobacco, narcotics, footwear, household textiles, telephone services etc. Single digit year-on-year rates of inflation were recorded in all centers during the month of February 2009 likely because, the global pressure which resulted in increase prices in February last year has eased off a little and prices for some products in the basket such as fuel, palm oil, fish, vegetables etc have fallen below their February 2008 level.

Column Description									
Column O : COICOP 12 Functions									
Column A : CPI Weighting									
Column B : CPI Of The Given Month (M) For Previous Year									
Column C : CPI Of The Given Month (M -3) For Current Year									
Column D : CPI Of The Given Month (M -2) For Current Year									
Column E : CPI Of The Given Month (M -1) For Current Year									
Column G : CPI Monthly Change In % ((F-E) X 100 /E)									
Column H : CPI 3 Months Change In % ((F-C) X 100 /C)									
Column I : CPI 12 Months Change In % ((F-B) X 100/B).									

The Interim National CPI measures the change in prices, on average, from month to month, of the goods and services bought by most households, in Freetown, Bo, Kenema and Makeni including all expenditure groups and both families and single persons. Prices are collected for 251 items. All prices collected are the prevailing retail market prices from six (6) markets in the Greater Freetown area, three (3) Markets in Bo Town, three (3) markets in Kenema Town and two (2) markets in Makeni Town for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. The National Index was computed by aggregating the CPI for the four index towns previously published separately with different base periods. The old CPI series for Bo, Kenema, Makeni and Freetown were rebased to base year 2003. Computation methodology changed from the Modified to the Traditional Laspeyres, and transformed into the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. The separate center CPIs were aggregated at the sub-class level.
