

CONSUMER PRICE INDEX (CPI) March, 2012: PRESS RELEASE

Released on Tuesday April 24, 2012 at 1:00 pm

MARCH 2012 MONTHLY INFLATION RATE INCREASES SLIGHTLY

The National monthly CPI (2007=100) increased from 187.22 per cent in February 2012 to 189.26 per cent in March 2012 resulting in a 1.1 per cent point increase in inflation rate this month. The March 2012 monthly inflation rate was therefore down by 0.53 percentage point when compared with the February, 2012 inflation figure (1.63 per cent). Similarly, the monthly rates of inflation increased slightly in all the regions. Western Area (0.80 per cent), Northern Region (1.13 per cent), Southern region (0.88 per cent) and the Eastern Region (1.46 per cent) all increased over the February 2012 month.

Nevertheless, the annual Inflation rate for March, 2012 decreased slightly from 15.45 per cent in February 2012 to 14.51 per cent in March, 2012. This reflects a 0.94 percentage point decrease over February, 2012 year-on-year. The appreciation of the Leone against the US dollar in March, 2012 may be responsible for this declining trend in inflation.

Considering the old CPI series (1992=100), there are mixed trends in the year-on-year rates of inflation. In Freetown the year-on-year rate of inflation increased from 15.82 percent in February 2012 to 16.37 percent in March, 2012, in Makeni from 18.01 per cent to 19.50 per cent while the year-on-year rates of inflation decreased in Kenema from 18.28 per cent to 16.91 per cent and in Bo from 16.59 per cent in February, 2012 to 16.85 per cent in March, 2012 during the same period.

FACTORS INFLUENCING CHANGES IN THE MONTHLY RATE OF INFLATION

The National monthly CPI for February increased from 187.22 in February, 2012 to 189.26 in March, 2012 resulting in a 1.1 per cent increase in inflation rate this month. There was a general increase in the price level in all the four regions affecting all components of the index. On a composite basis, there were increases in the indices for the following groups; food and non-alcoholic beverages (1.13 per cent), alcoholic beverage, tobacco and narcotics (1.25 per cent), clothing and footwear (2.19 per cent), housing, water, electricity, gas and other fuels (0.31 per cent), furnishing, household equipment and household maintenance (0.07 per cent), health (2.24 per cent), communication (0.10 per cent) and restaurant and hotels (2.18 per cent). The food products which increased this month include bread and cereals (1.98 per cent), fruits (2.17 per cent), milk, cheese and eggs (0.86 per cent), meat (0.11 per cent) and fish and seafood (0.12 per cent) and vegetables (2.43 per cent). The price increases were however marginal compared with February 2012.

Column Description									
Column o : COICOP 12 functions									
Column a : CPI weighting									
Column b : CPI of the given month (m) for previous year									
Column c : CPI of the given month (m -3) for current year									
Column d : CPI of the given month (m -2) for current year									
Column e : CPI of the given month (m -1) for current year									
Column g : CPI monthly change in % ((f-e) x 100 /e)									
Column h : CPI 3 months change in % ((f-c) x 100 /c)									
Column i : CPI 12 months change in % ((f-b) x 100/b).									

The National CPI measures the change in prices, on average, from month to month, of the goods and services bought by most households, in Freetown, Bo, Kenema and Makeni including all expenditure groups and both families and single persons. Prices are collected for 251 items. All prices collected are the prevailing retail market prices from six (6) markets in the Greater Freetown area, three (3) Markets in Bo Town, three (3) markets in Kenema Town and two (2) markets in Makeni Town for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. The National Index was computed by aggregating the CPI for the four index towns previously published separately with different base periods. The old CPI series for Bo, Kenema, Makeni and Freetown were rebased to base year 2003, Computation methodology changed from the Modified to the Traditional Laspeyres, and transformed into the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. The separate center CPIs were aggregated at the sub-class level at which level new weights were also introduced to obtain the Interim National Index.
