

CONSUMER PRICE INDEX (CPI) DECEMBER, 2009: PRESS RELEASE

Released on Monday, January 11, 2010: at 1:00 pm

DECEMBER 2009 MONTHLY INFLATION RATE INCREASES SIGNIFICANTLY

The monthly rate of inflation for the composite index (2003=100) increased significantly slightly by 2.12 percent from 207.56 percent in November 2009 to 211.96 percent in December 2009. . Similarly the monthly rates of inflation increased in all centers. Freetown (1.4percent), Bo (1.09;percent), Kenema (1.7percent and Makeni (0.26 percent) during the same period. The composite year-on-year inflation rate (2003=100) increased by 1.8 percentage points from 10.42 per cent in November 2009 to 12.22 percent in December 2009. There were upward movements in the year-on-year rates of inflation during the month of December 2009. The year-on-year rate of inflation increased in Freetown from 11.3 percent in November 2009 to 12.9 percent in December 2009, in Bo from 10.36 per cent to 12.07 per cent, in Kenema from 10.5 per cent to 12.3 percent and in Makeni from 10.9 to 14.1 per cent during the same period.

Considering the old CPI series (1992=100), there were also upward movements in the CPI in all the four centers. In Freetown the year-on-year rate of inflation increased from 9.69 percent in November to 10.78 percent in December 2009, in Bo from 10.56 percent in November 2009 to 14.62 per cent in December 2009, in Kenema from 8.71 per cent to 11.08 per cent and in Makeni from 10.13 per cent to 12.45 percent during the same period.

FACTORS INFLUENCING CHANGES IN THE MONTHLY RATE OF INFLATION

The combined monthly CPI for December increased from 207.56 in November 2009 to 211.96 resulting in a 2.12 percent increase in inflation this month. The increase in the price level for December 2009 was as a result of the increase in the cost of food particularly fish (6.52 percent), meat (3.34 percent), fruits (1.09 percent), oils and fats (3.35 per cent) and vegetables (4.18 percent) which reflects the fact that this time of the year is the time when most of these food products in the basket are scarce.

Again, the general rise in the Consumer Price Index may also have been due to the shortage of the major foreign currencies like the US dollars, Euro to name but two against the Leone and also the political crisis in Guinea which has to some extent affected the supply of some food products during the December month.

Column H : CPI 3 Months Change In % ((F-C) X 100 /C)									
Column I: CPI 12 Months Change In % ((F-B) X 100/B).									

The Interim National CPI measures the change in prices, on average, from month to month, of the goods and services bought by most households, in Freetown, Bo, Kenema and Makeni including all expenditure groups and both families and single persons. Prices are collected for 251 items. All prices collected are the prevailing retail market prices from six (6) markets in the Greater Freetown area, three (3) Markets in Bo Town, three (3) markets in Kenema Town and two (2) markets in Makeni Town for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. The National Index was computed by aggregating the CPI for the four index towns previously published separately with different base periods. The old CPI series for Bo, Kenema, Makeni and Freetown were rebased to base year 2003. Computation methodology changed from the Modified to the Traditional Laspeyres, and transformed into the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. The separate center CPIs were aggregated at the sub-class level.
