

CONSUMER PRICE INDEX (CPI) April, 2015: PRESS RELEASE
Released on Monday May 18, 2015 at 1:00 pm

APRIL 2015 MONTHLY INFLATION RATE INCREASES SLIGHTLY

The national monthly CPI (2007=100) increased from 2241.9 per cent in March, 2015 to 2243.43 per cent in April, 2015 resulting in a 0.63 per cent increase in inflation rate this month. Similarly, the monthly rates of inflation increased in all the regions. Western Area (0.80per cent), Northern Region (0.77 per cent), Southern region(0.50 per cent) and the Eastern Region(0.89 per cent) comprising two centers, Kenema(0.87 per cent) and Kono (0.19 per cent) during the same period. Also, the national annual inflation rate for April, 2015 increased slightly from 7.61 per cent in March, 2015 to 7.67 per cent in April, 2015. Again, the year-on-year rates of inflation increased in all the regions. In Northern region the year-on-year rate of inflation increased slightly from 7.34 per cent to 7.41 per cent and in Western region from 8.10 per cent to 8.15 per cent while in the Southern region, the year-on-year rates of inflation decreased slightly from 7.33 per cent to 7.31 per cent and in Eastern region from 7.75 per cent to 7.66 per cent.

Figures 1a &1b below illustrate the movement in the year-on-year rates of inflation and monthly rates of inflation respectively for the National CPI and other CPI centers while table 1 below shows the National CPI from the months of April, 2014 to April, 2015 and the 12 month change in the CPI for the main index groups. Considering the old CPI series (1992=100), the year-on-year rates of inflation increased slightly in Freetown from 8.29 per cent in March, 2015 to 8.51 per cent in April, 2015, in Makeni from 8.90 per cent to 9.0 per cent, in Kenema from 8.34 per cent to 8.76 per cent and in Bo from 8.54 per cent to 8.98 per cent during the same period.

FACTORS INFLUENCING CHANGES IN THE MONTHLY RATE OF INFLATION

The national monthly CPI (2007=100) increased from 241.9 per cent in March, 2015 to 243.43 per cent in April, 2015 resulting in a 0.63 per cent increase in inflation rate this month. However, this reflects a monthly increase that is greater than the previous month, meaning that prices are increasing at a slightly higher rate especially the restaurant and hotels and educational materials as a result of an increase in the number of guests and the reopening of schools and colleges. There was a general increase in the price level in all the four regions which affected most of the components in the CPI basket.

At the national level, there were increases in the indices for the following groups; food and non-alcoholic beverages (0.72 per cent), housing, water, electricity, gas & other fuels(0.65 per cent), clothing and footwear (0.52 per cent), furnishing, household equipment and household maintenance(0.55 per cent), health(0.63 per cent), restaurant and hotels(1.84 per cent), transport (0.13 per cent) and communication (0.46per cent). The food products for which indices increased this month include bread cereals(0.73 per cent), meat(1.11 per cent), fish and seafood(1.50 per cent), milk, cheese and eggs(0.24 per cent), oils and fats(0.10 per cent), vegetables(0.82 per cent) and fruits(0.34 per cent). The increase in fish and seafood and meat indices in all the centers is as a result of the shortage in their supply across the country.However, there was a decrease on the price of fats and oils and fruits but such decrease has little or no effect on the CPI basket.

Column i : CPI 12 months change in % ((f-b) x 100/b).									

The National CPI measures the change in prices, on average, from month to month, of the goods and services bought by most households, in Freetown, Bo, Kenema and Makeni including all expenditure groups and both families and single persons. Prices are collected for 251 items. All prices collected are the prevailing retail market prices from six (6) markets in the Greater Freetown area, three (3) Markets in Bo Town, three (3) markets in Kenema Town and two (2) markets in Makeni Town for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. The National Index was computed by aggregating the CPI for the four index towns previously published separately with different base periods. The old CPI series for Bo, Kenema, Makeni and Freetown were rebased to base year 2003, Computation methodology changed from the Modified to the Traditional Laspeyres, and transformed into the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. The separate center CPIs were aggregated at the sub-class level at which level new weights were also introduced to obtain the Interim National Index.
