Four regions went downwards: Western Area from 8.03 percent in August 2025 to 7.75 percent in September 2025; Eastern region from 2.02 in August 2025 to 0.94 percent in September 2025; Southern region from 3.48 percent in August 2025 to 1.72 percent in September 2025; and North-west region from 4.43 percent in August 2025 to 1.86 percent in September 2025. **One region went upwards:** Northern region from 6.58 percent in August 2025 to 9.67 percent in September 2025.

From the table above, it is observed that only the Western and Northern regions' inflation rates are above the national estimate for the month of September 2025; all other regions' estimates are below. It is further observed that all five regions continued to report single-digit inflation rates in September 2025.

The figures below illustrate the yearly (1A) and monthly (1B) inflation rates at regional levels.

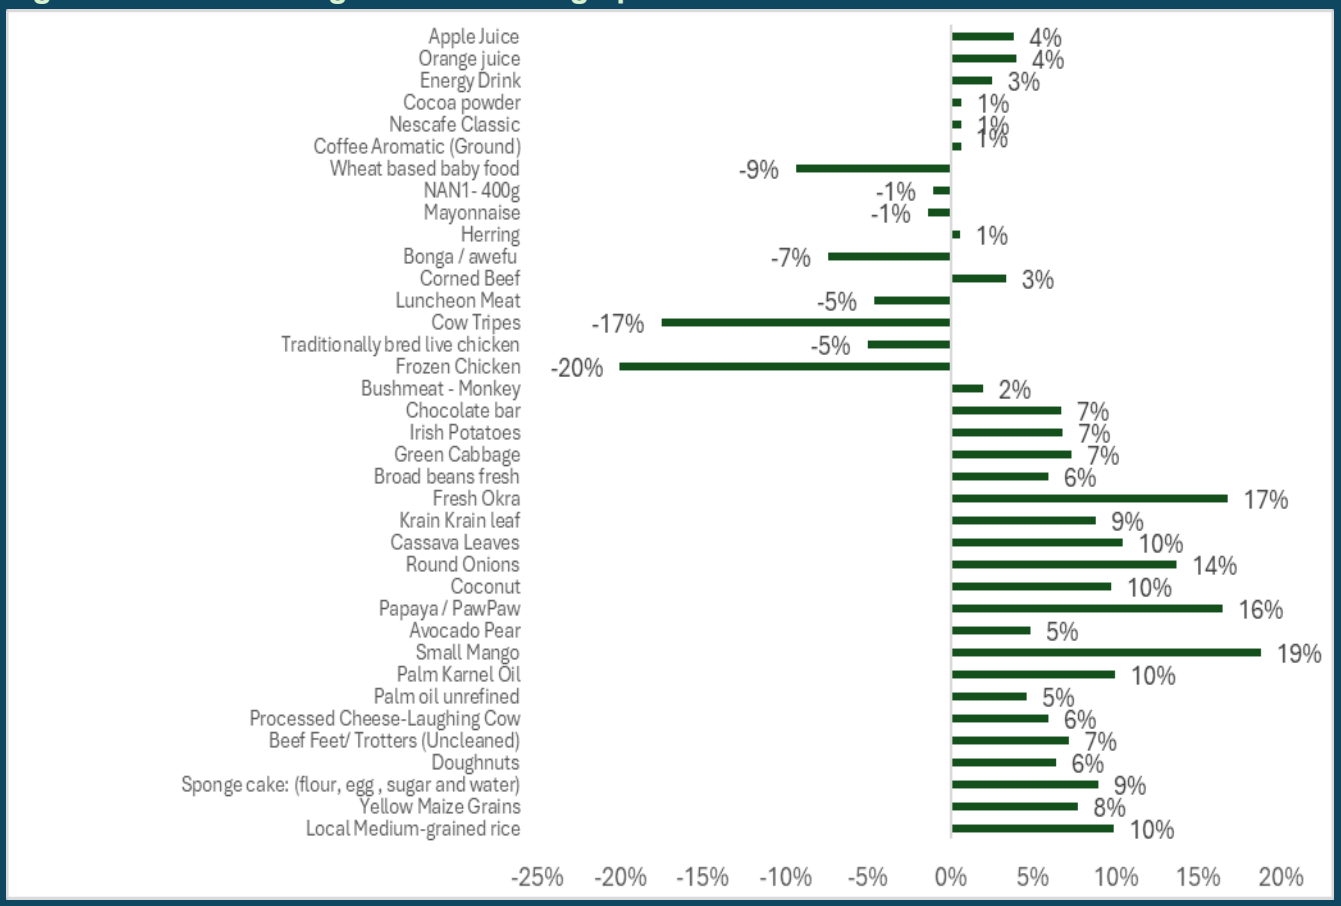
3.0 FOOD[3] AND NON-FOOD[4] COMPONENTS

Food and non-alcoholic beverages inflation decreased by 0.07 percentage point from 2.63 percent in August 2025 to 2.56 percent in September 2025. In this division, food inflation decreased by 0.65 percentage point from 0.50 percent in August 2025 and normally determines the direction of change for this division because it has a bigger weight. The non-alcoholic beverages inflation increased by 17.04 percentage points from 59.45 percent in August 2025.

Figure 2.1: Changes in the average prices of selected Food and non-alcoholic items



The inflation rate for non-food component decreased from 8.58 percent in August 2025 to 7.73 percent in September 2025; that is 0.85 percentage point decrease. In this component, three divisions went up, seven went down and one unchanged.

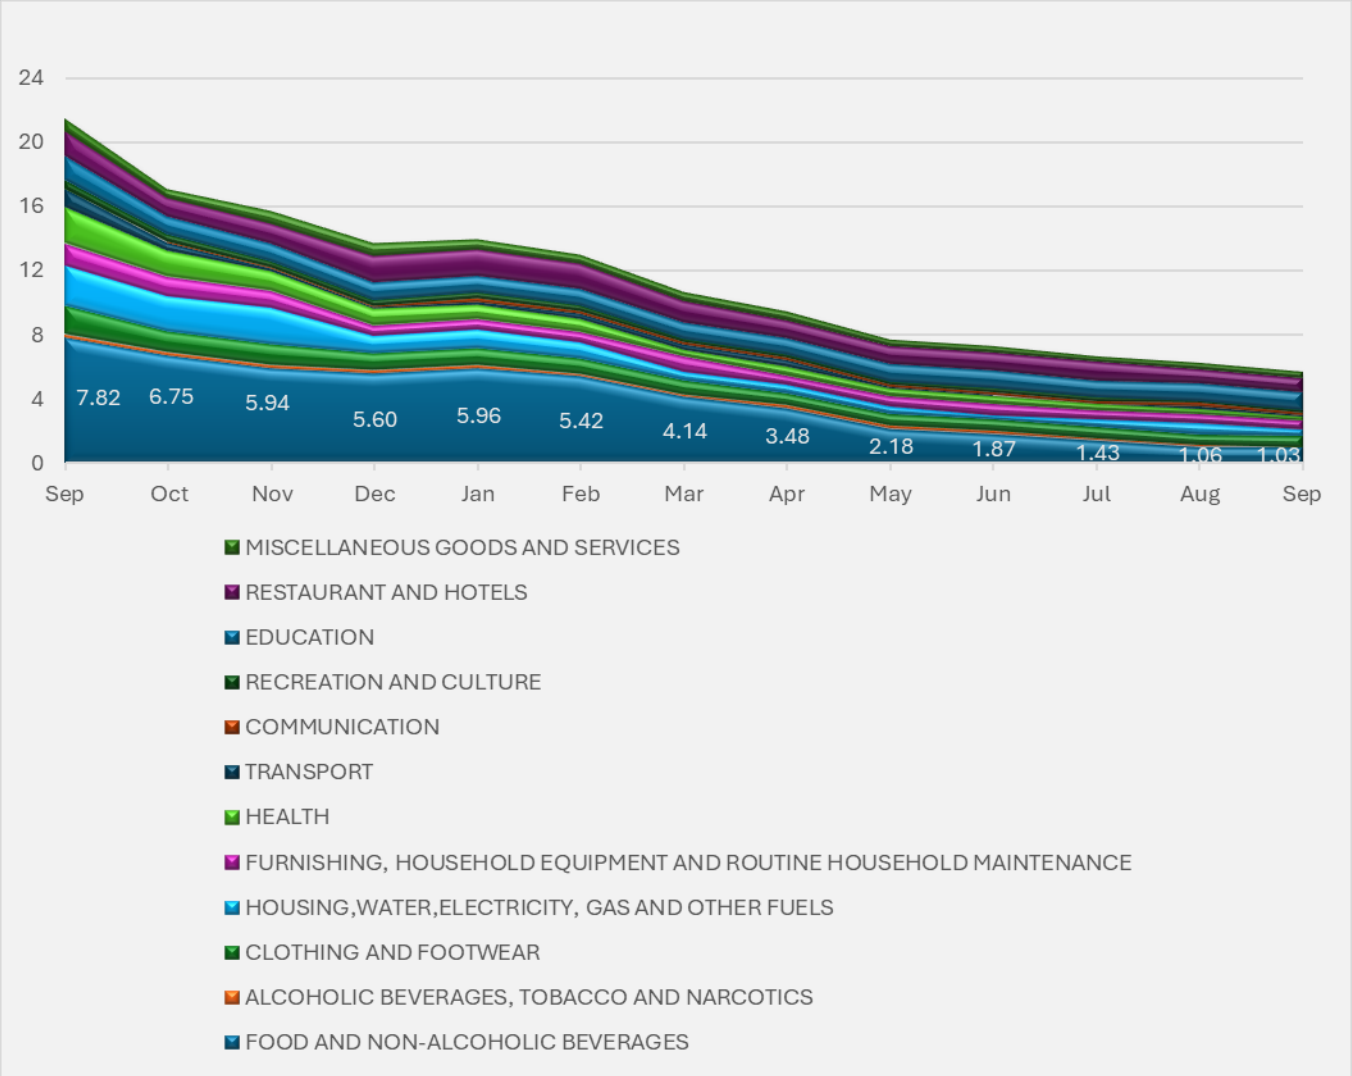
4.0 IMPACT CONTRIBUTIONS OF COICOP DIVISIONS TO ANNUAL INFLATION RATE (YoY)

The annual National Consumer Price Inflation (year-on-year) for September 2025 is 5.36 percent, down by 0.49 percentage point from 5.85 percent in August 2025. Impact analyses, relative to the weights of the divisions, show Food and non-alcoholic beverages continue to make the most impact on inflation even though it declined in the month of September 2025.

Figure 3: Impact contributions of the COICOP divisions to inflation rate (September24 – September 25)



Concluding Note: A single digit inflation rate has now been reported for six straight months since April 2025. We noted that the headline inflation rate dropped for eight COICOP divisions and for four regions in September 2025; and all the five regions reported single-digit inflation rates. Additionally, food inflation has dropped to a five-year low with a single digit inflation rate. Finally, we observed that the national estimate is above all other regions' estimates, except for the Western and Northern Regions' estimates.

NOTE: The National CPI measures the change in prices, on average, from month to month, of the goods and services bought by households, in Freetown, Bo, Kenema, Kono, Makeni, Port Loko-Kambia and include all expenditure groups. Prices are collected for least 440 items. All prices collected are the prevailing retail market prices from six (6) markets in Freetown and, three (3) Markets each in Bo, Kenema, Kono, Makeni, Port Loko-Kambia and for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. We are using the Modified Laspeyres formula to compute indices according to the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. Sierra Leone has recently rebased the CPI to December 2021, increased the number of items in the basket and expanded the coverage to North-West region.
