

CONSUMER PRICE INDEX (CPI) November, 2017: PRESS RELEASE

Released on Monday December 18, 2017 at 1:00 pm

NOVEMBER 2017 MONTHLY INFLATION RATE INCREASES SIGNIFICANTLY

The national monthly CPI (2008=100) increased from 207.88 per cent in October, 2017 to 212.46 per cent in November, 2017 resulting in a 2.20 per cent increase in inflation rate this month. Similarly, the monthly rates of inflation increased in all the regions. Western Area (2.07 per cent), Northern Region (2.11 per cent), Southern region (3.42 per cent) and the Eastern Region (1.26 per cent) comprising two centers, Kenema (0.84 per cent) and Kono (1.69 per cent) during the same period. Also, the national annual inflation rate for November, 2017 decreased slightly from 16.86 per cent in October, 2017 to 16.26 per cent in November, 2017. Again, the year-on-year rates of inflation decreased in Northern region from 17.57 per cent in October, 2017 to 16.44 per cent in November, 2017, in Eastern region from 20.36 per cent to 17.51 and in Western region from 16.30 per cent to 16.45 per cent while the year-on-year rate of inflation increased in Southern region from 14.57 per cent to 14.59 per cent. Figures 1a & 1b below illustrate the movement in the year-on-year rates of inflation and monthly rates of inflation respectively for the National CPI and other CPI centers while table 1 below shows the National CPI from the months of November, 2016 to November, 2017 and the 12 month change in the CPI for the main index groups.

FACTORS INFLUENCING CHANGES IN THE MONTHLY RATE OF INFLATION

The national monthly CPI (2008=100) increased from 207.88 per cent in October, 2017 to 212.46 per cent in November, 2017 resulting in a 2.20 per cent increase in inflation rate this month. This reflects a slight monthly increase that is greater than the previous month, meaning that prices are increasing at a relatively higher rate. There was a general increase in the price level in all the four regions which affected most of the components in the CPI basket. The indices that slightly increased were food and non-alcoholic beverages (3.44 per cent), clothing and footwear (1.33 per cent), housing, water, electricity, gas and other fuels (1.14 per cent), health (0.75 per cent), transport (0.14 per cent), alcoholic beverages, tobacco and narcotics (1.9 per cent), furniture, household equipment and household maintenance (0.98 per cent), restaurant and hotels (1.15 per cent) and recreation and culture (1.73 per cent). The increases on food index in all the centers was probably due to the shortage in the supply of most of the food items in the CPI basket which has contributed to the significantly increase in the monthly inflation rate. The food products for which indices increased this month include bread and cereals, meat, fish and seafood, fruits and vegetables, fats and oil.

The National CPI measures the change in prices, on average, from month to month, of the goods and services bought by most households, in Freetown, Bo, Kenema and Makeni including all expenditure groups and both families and single persons. Prices are collected for 251 items. All prices collected are the prevailing retail market prices from six (6) markets in the Greater Freetown area, three (3) Markets in Bo Town, three (3) markets in Kenema Town and two (2) markets in Makeni Town for weekly prices and other outlets for monthly items whose prices are less likely to fluctuate rapidly. The National Index was computed by aggregating the CPI for the four index towns previously published separately with different base periods. The old CPI series for Bo, Kenema, Makeni and Freetown were rebased to base year 2003, Computation methodology changed from the Modified to the Traditional Laspeyres, and transformed into the Classification of Individual Consumption by Purpose (COICOP) with 12 functions. The separate center CPIs were aggregated at the sub-class level at which level new weights were also introduced to obtain the Interim National Index.
